Sumitomo Chemical Asia selects Dynamics NAV

Sumitomo Chemical Asia (SCA) selects Microsoft Dynamics NAV from Accenovate Consulting Asia to implement the Logistics Execution System (LES). The breaking point for choosing Dynamics NAV was the integrated concept of SCA main ERP system with Dynamics NAV through the MS Biztalk Server.

SCA was established in May 2006 as a marketing, sales and distribution coordination center. In 4th Quarter 2005, the joint venture between Sumitomo Chemical and Saudi Aramco was established to develop the Rabigh Refinery and Petrochemical Project (Petro Rabigh). This US 10-billion-dollar project entails the upgrading of the existing Rabigh refinery at the Red Sea coast of the Kingdom of Saudi Arabia.
