

Recently, the British department-store group Debenhams has re-enter Malaysia's retail market recently after an absence of two years. This time, Debenhams has teamed up with new master franchisee Stellar Retail Sdn Bhd.

The famous adage "Knowledge is power" still holds true despite the good and bad times. Business leaders depend on information to make informed decisions, especially when faced with tough economic conditions such as the current financial crisis.

As change is happening fast because of globalization and the quick availability of information, business leaders need to act with a high level of accuracy and speed to cope with the changing economic and they would need tools like the enterprise resource planning (ERP) solutions to improve on organizational performance.

After evaluating several solutions, Debenhams has selected Microsoft Dynamics NAV and LS Retail, a fully seamless integrated business solution designed for small to medium-sized companies.

Debenhams Malaysia has engaged us, to implement the Microsoft Dynamics NAV [<http://www.microsoft.com/dynamics/nav/default.aspx> ], & LS Retail system [ <http://www.lsretail.com> ] within 2 months. As a Microsoft Certified Partner, we took up the challenge and have successfully rolled out the system before the official launch date.

Debenhams open its RM3 million store inside The Curve shopping mall without any major issues on the 7<sup>th</sup> November 2008 and we are proud to announce our successful and smooth collaboration with them.

Best Wishes,

Accenovate Technology Marketing Team
